

Calibrant spectra for Calibrant A

Theo. m/z: 78.959000

Most abundant signal: 78.958733

Weighted average: 78.958549

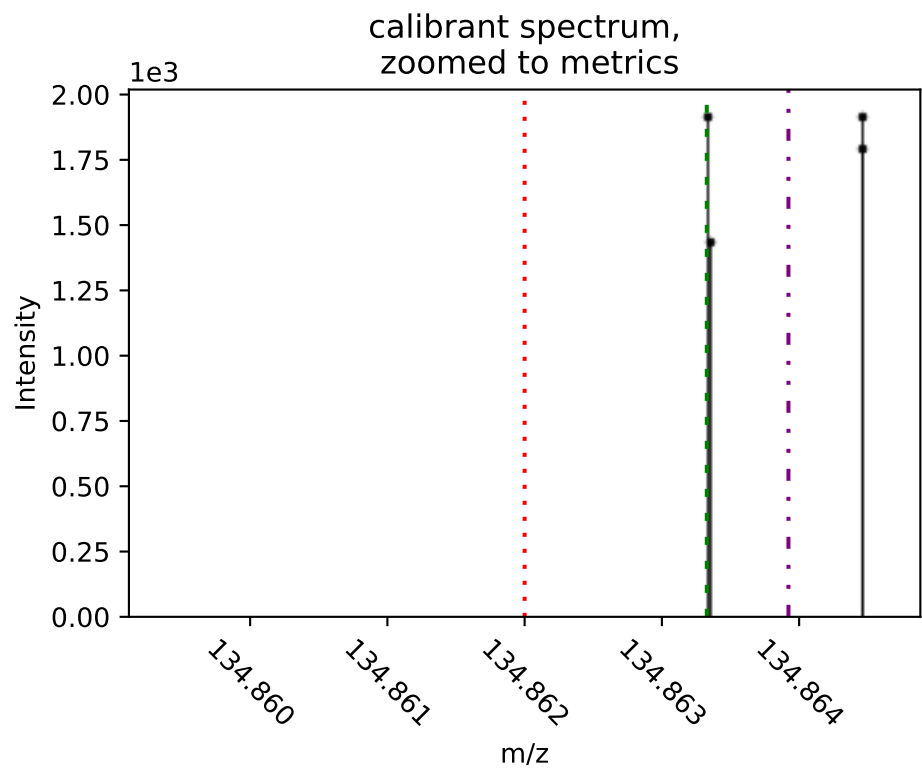

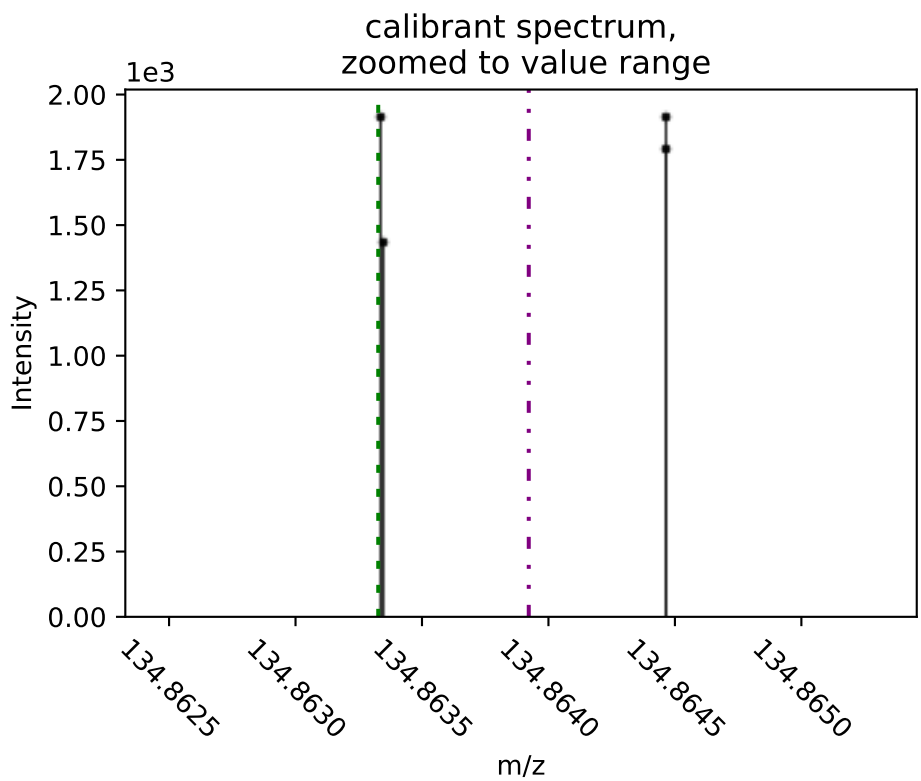

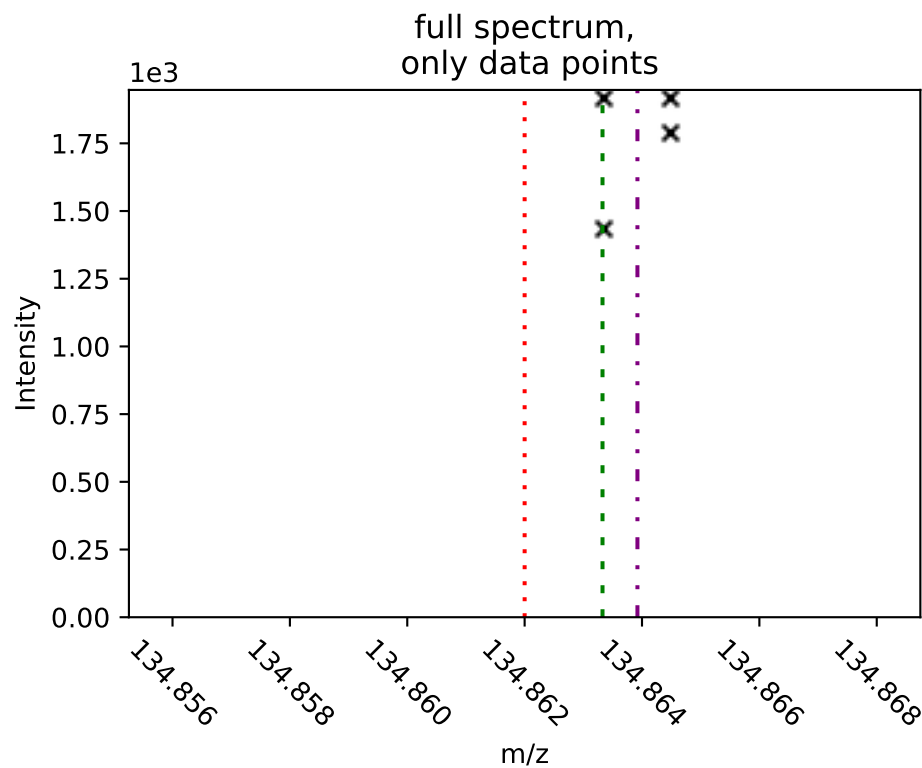

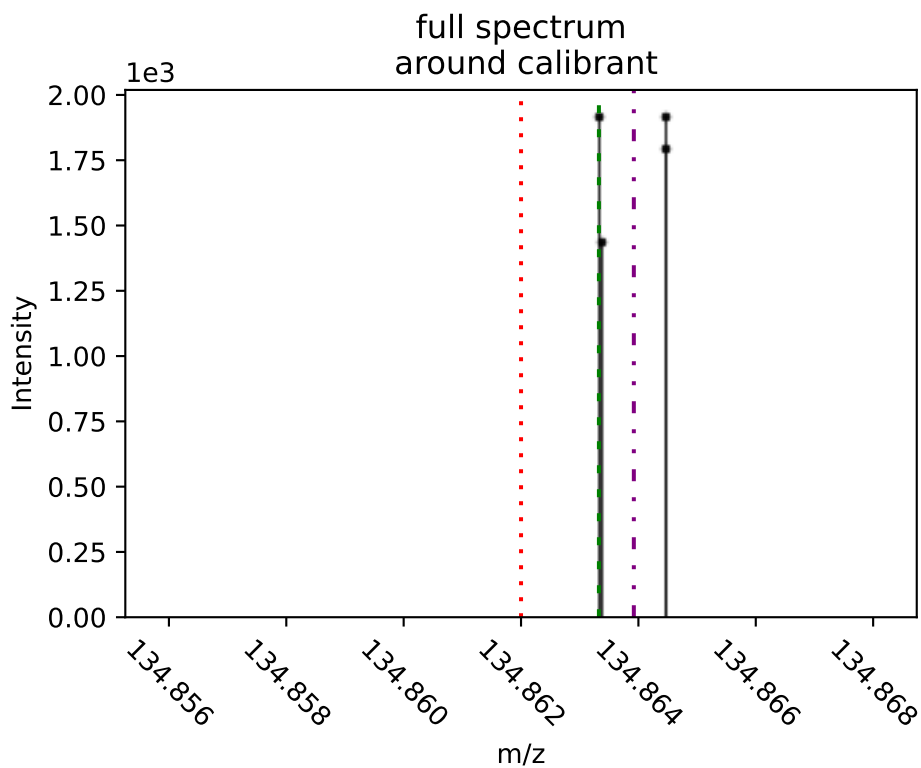

Calibrant spectra for Calibrant B

Theo. m/z: 134.862000

Most abundant signal: 134.86327

Weighted average: 134.863922

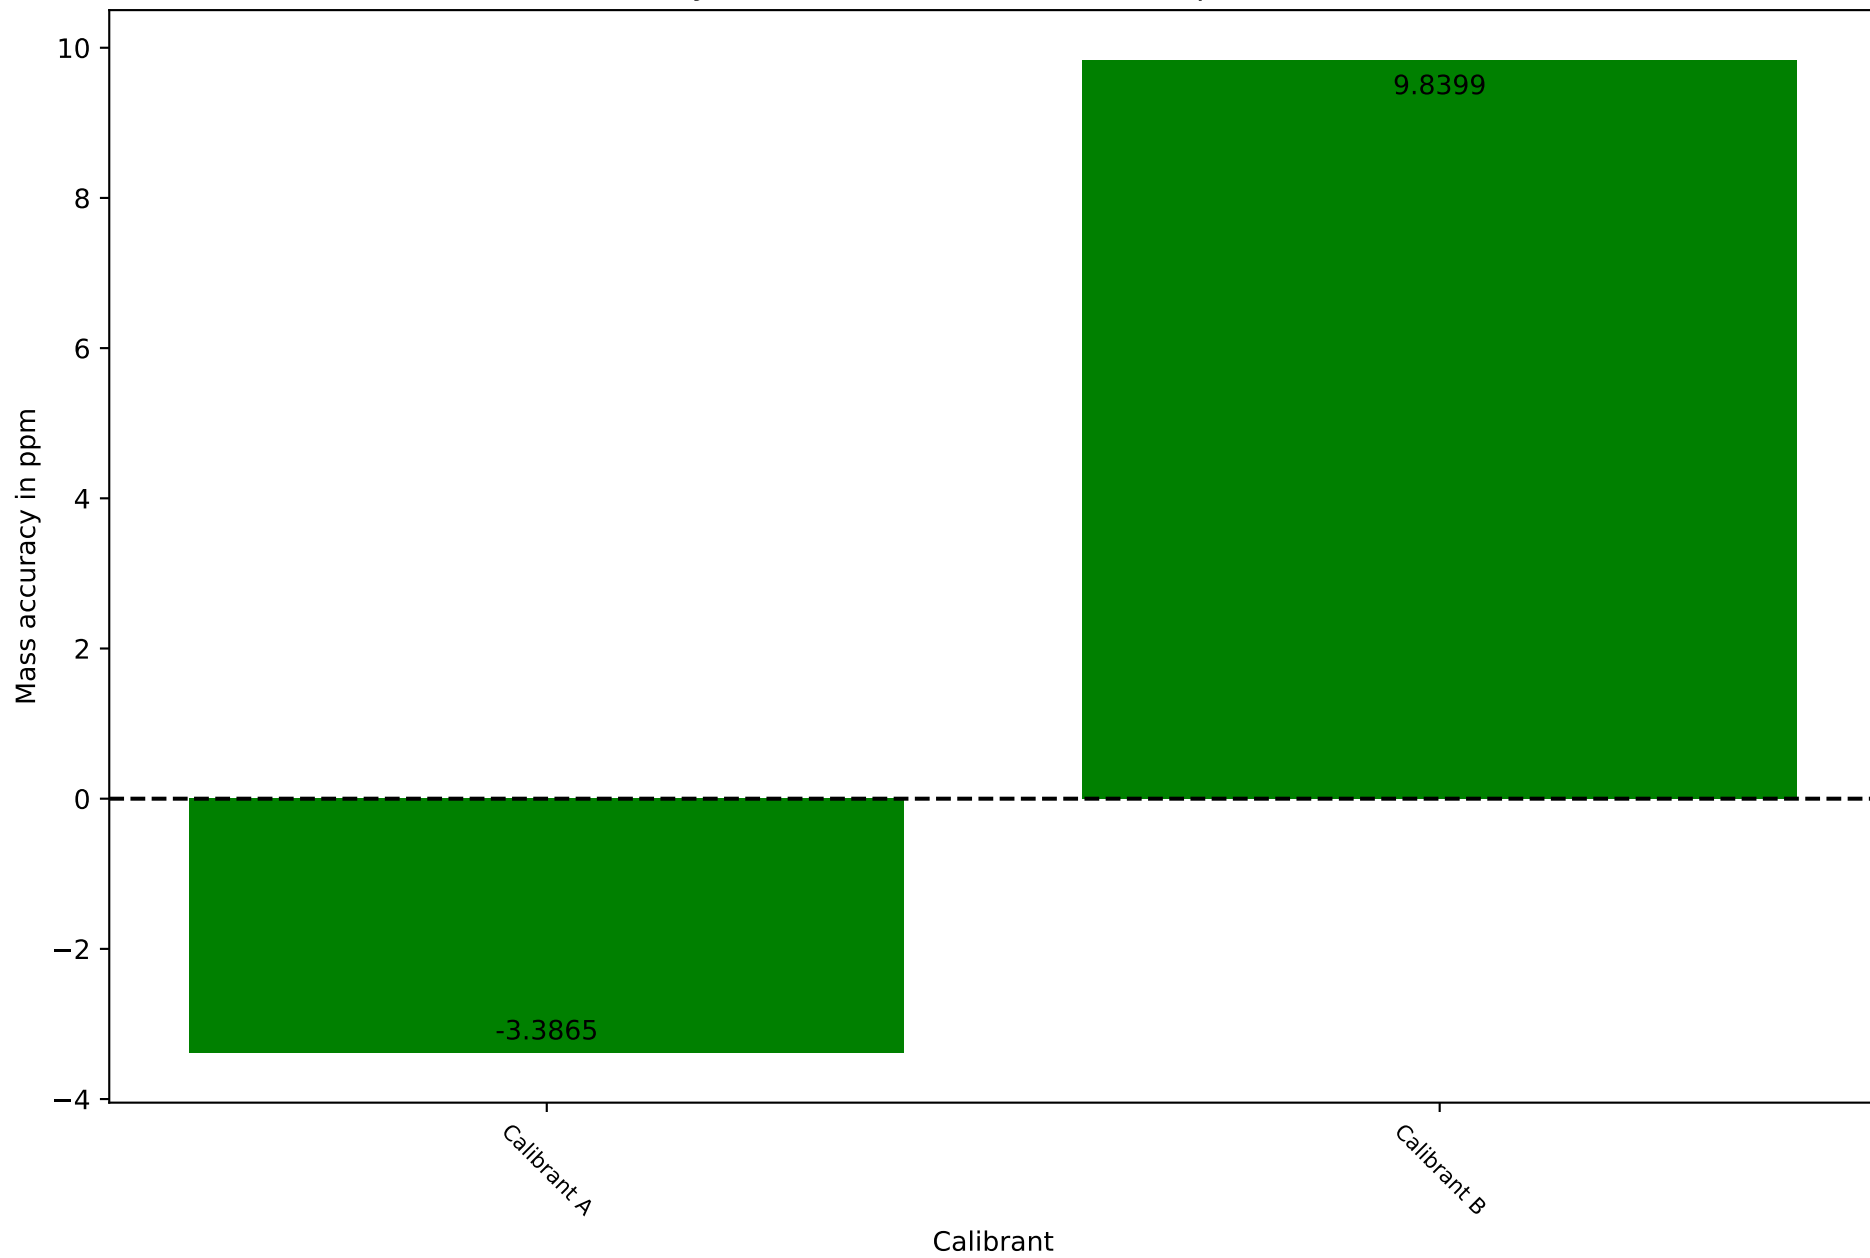

calibrant spectra for Calibrant C

no peak data found
for 222.222
in specified coverage interval

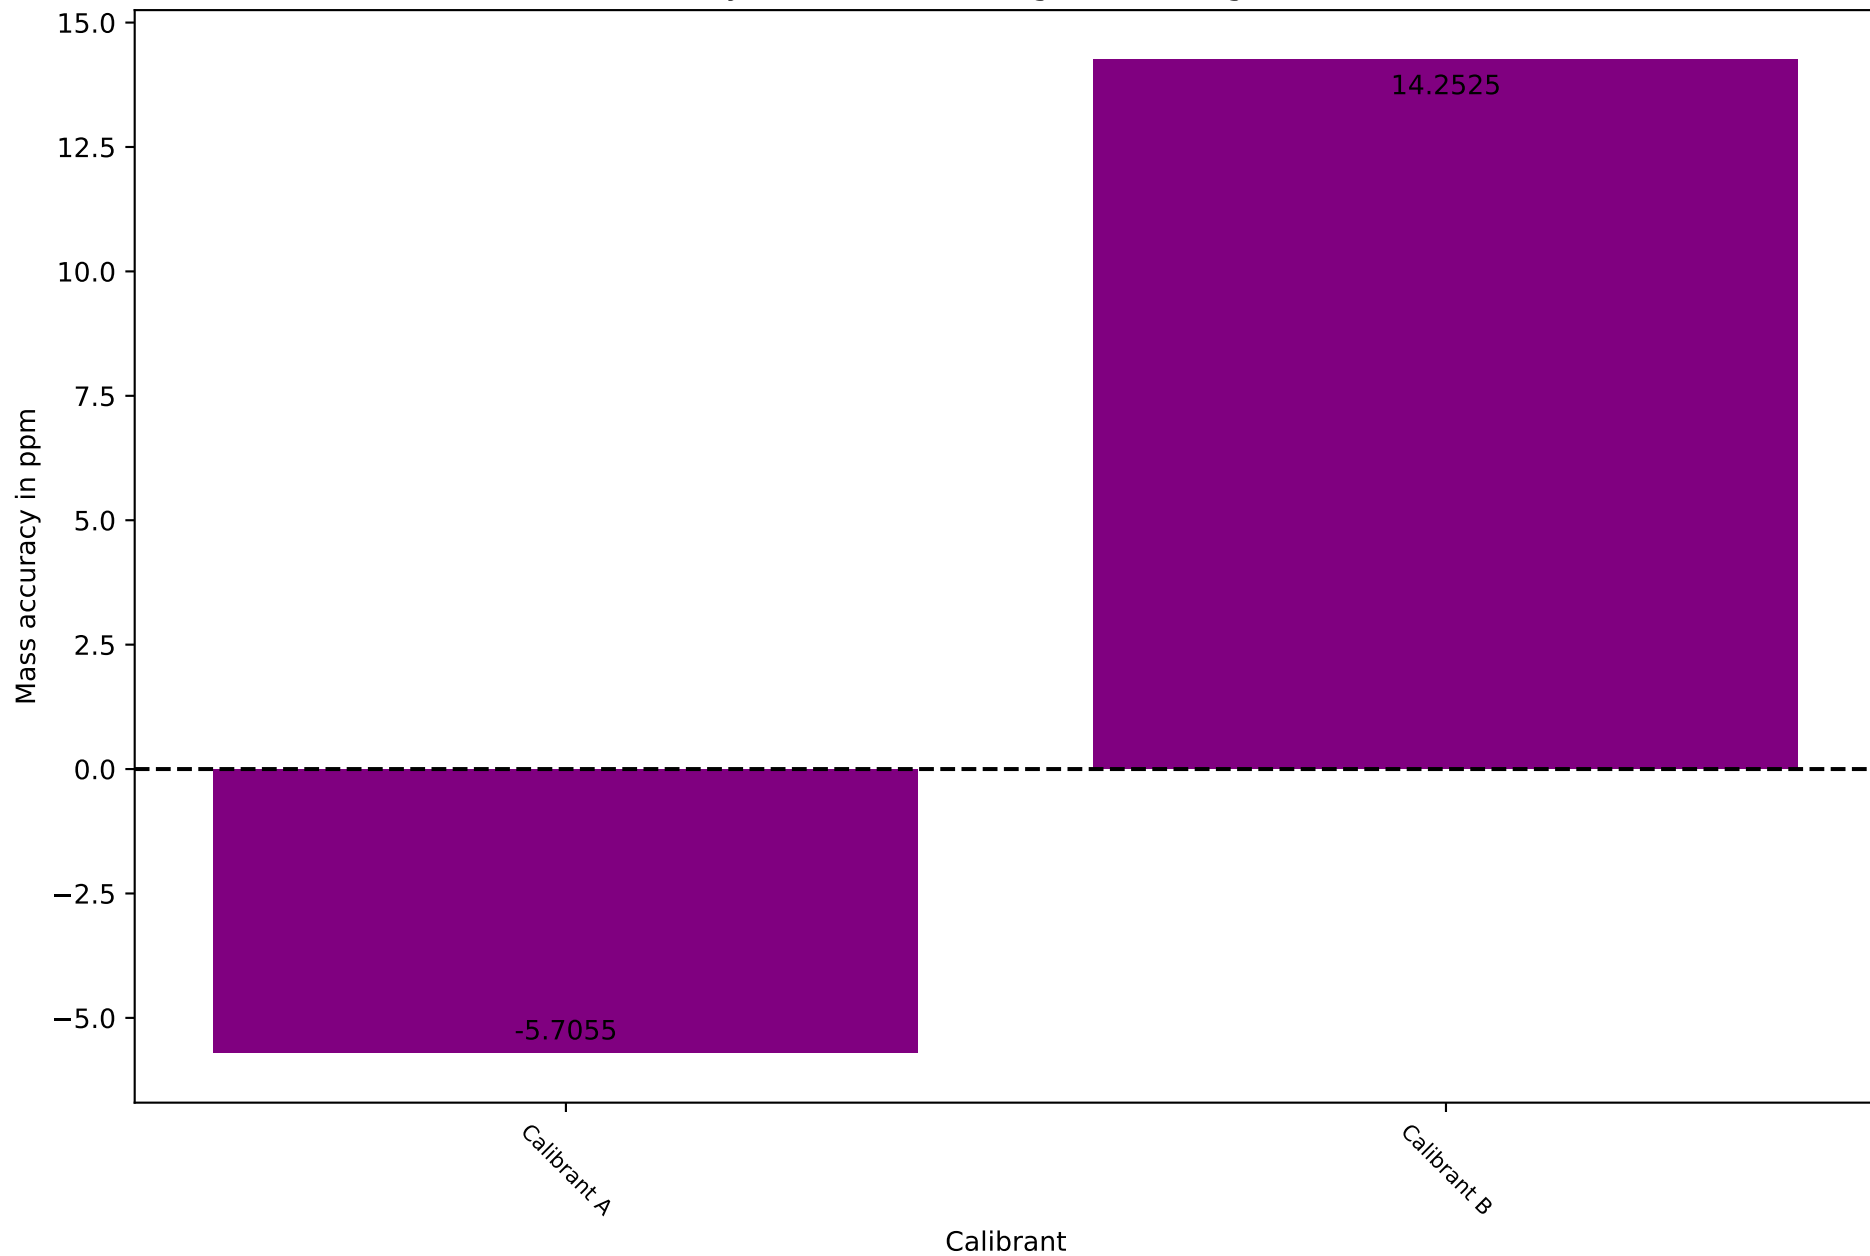

calibrant spectra for CalibrantD

no peak data found
for 500.0
in specified coverage interval

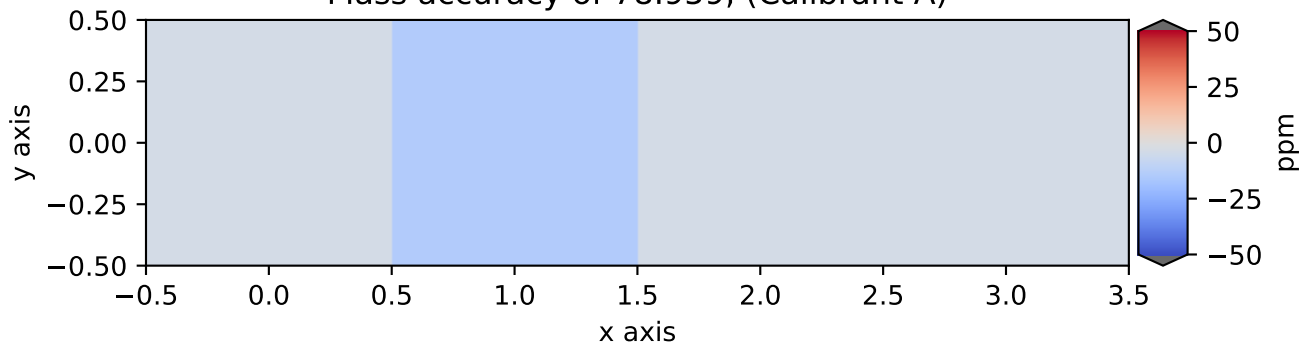

mass accuracy of calibrants (most abundant peak vs theoretical)

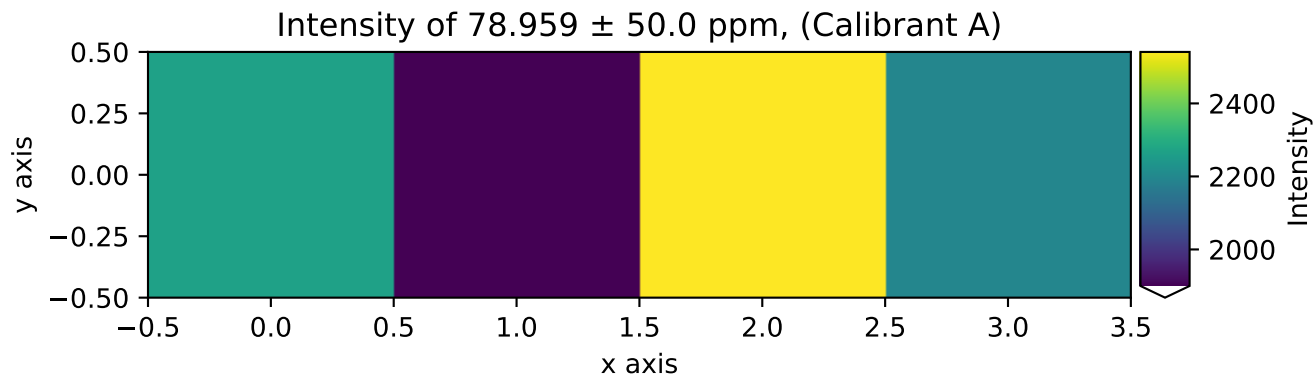

mass accuracy of calibrants (weighed average vs theoretical)

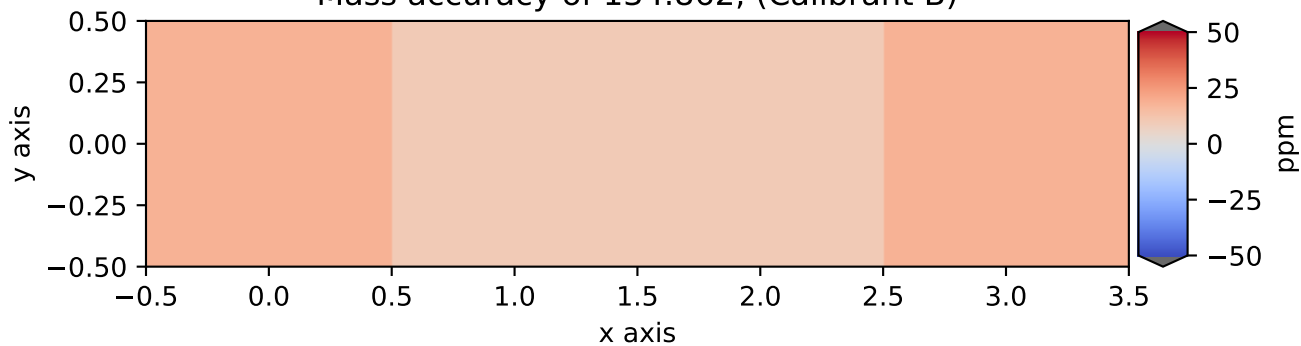

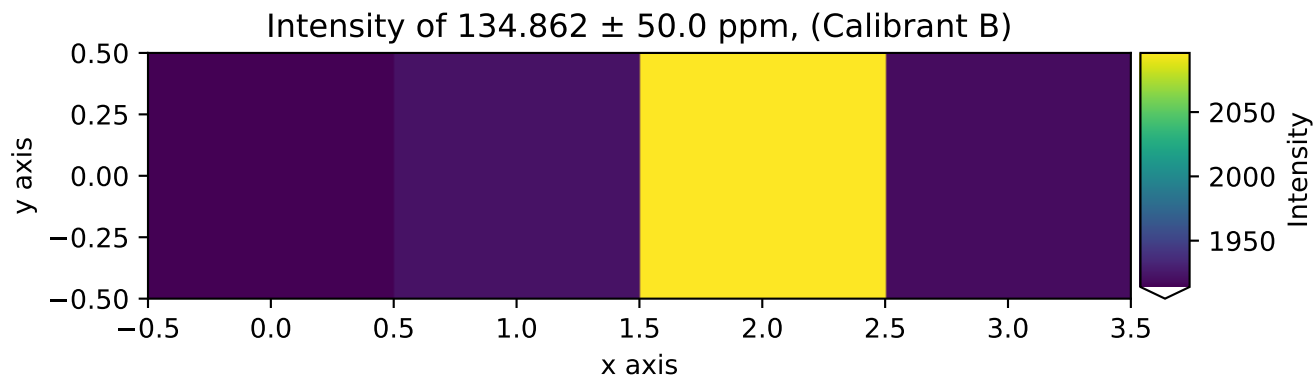

Mass accuracy of 78.959, (Calibrant A)

Mass accuracy of 134.862, (Calibrant B)

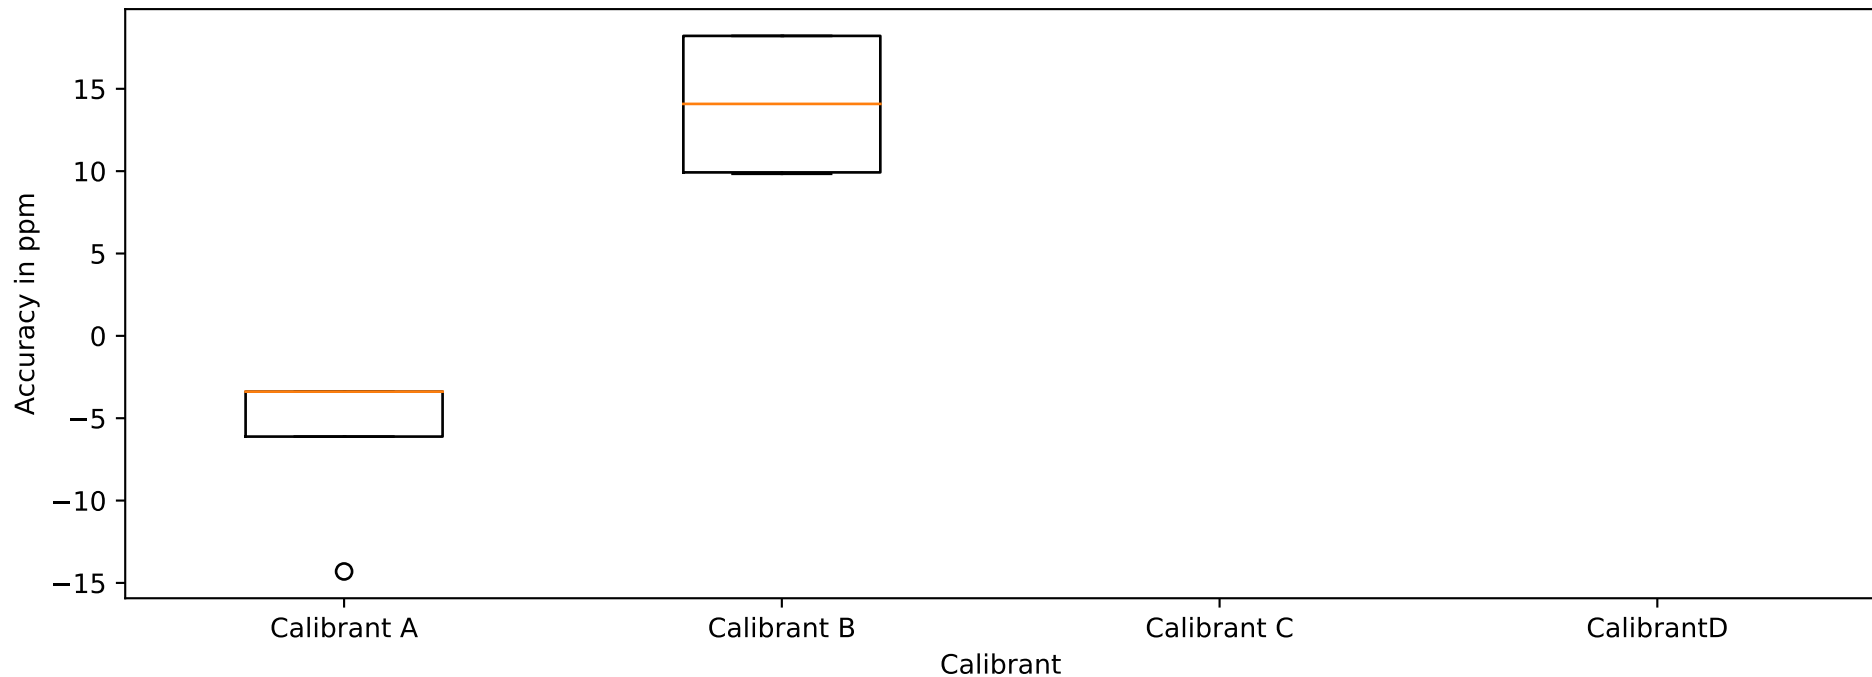

calibrant spectra for Calibrant C

no peak data found
for 222.222
in specified coverage interval

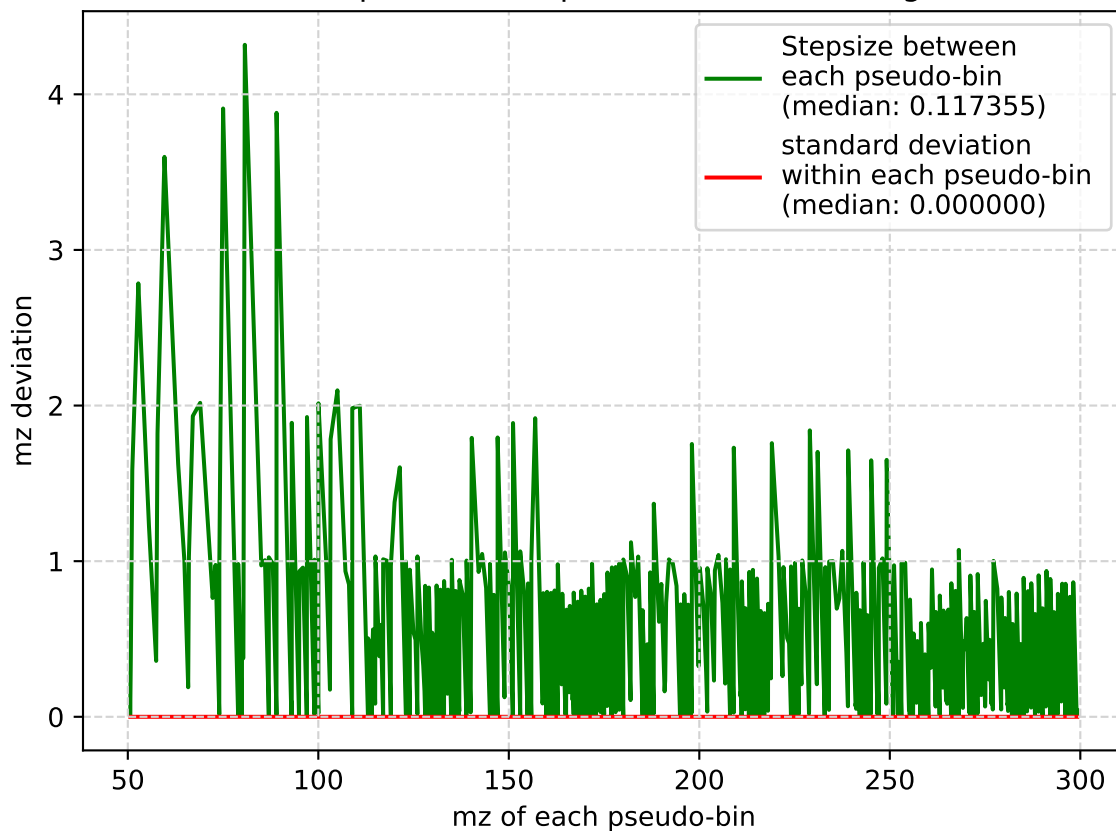

calibrant spectra for CalibrantD

no peak data found
for 500.0
in specified coverage interval

Boxplot of mass accuracies within ppm interval by calibrant

Comparison of acquisition-based binning
